OpenOva

CONFIDENTIAL

COMMERCIAL OFFER · MARCH 2026

Pricing & Professional Services

Open-source foundation. No software licensing fees.
One support subscription covering the full platform.
Pay only for the expertise that runs it.

Pay-As-You-Go · Enterprise Subscription Agreement · Volume Discounts · Professional Services · Rate Cards

WHY OPENOVA

No software licensing fees — ever
Open-source foundation. The commercial relationship is a support subscription, not a software license.

One flat subscription — the full platform, no feature gating
All products, all components, Specter AIOps, Catalyst — one rate. Community edition equals enterprise edition.

AI-native by design — not bolted on
Specter carries pre-built semantic knowledge of every component, failure mode, and integration dependency across the entire stack.

Automation-first — standard operations are not billed as services
Provisioning, Day-2 ops, observability, DR infrastructure, and security tooling are included in the subscription.

CONTENTS

01 **Platform Subscription Pricing** · PAYG · Enterprise Subscription Agreement · Volume discounts

02 **Professional Services Rate Card** · Engineering roles · T&M · SOW engagements

03 **Cloud Services Catalog** · Automated delivery at zero PS cost · Chargeable custom services

04 **Commercial Terms** · Billing · Renewal model · Included vs. not included

FLAT · ALL-INCLUSIVE · ONE PRICE

Platform Subscription Pricing

All components. All products. Specter AIOps. One support subscription — no licensing fees, no per-component charges.

No software licensing fees. OpenOva charges a single support subscription per vCPU-core under management across all Kubernetes worker nodes. No tiers, no feature gating, no per-component licensing. Open-source foundation — commercially supported at enterprise grade.

PAY-AS-YOU-GO

PAYG · MONTHLY · NO COMMITMENT

$ 49 /vCPU/month

Billed monthly in arrears · Cancel anytime · Minimum 10 vCPU

EVERYTHING INCLUDED

- Full platform — all components ✓
- Specter AIOps engine ✓
- Catalyst IDP + Lifecycle Manager ✓
- All product families ✓
- 24×7 support + dedicated CSM ✓
- Blueprint upgrades & releases ✓
- Exodus migration assessment ✓

ENTERPRISE SUBSCRIPTION AGREEMENT (ESA) — ANNUAL, VOLUME-BASED

ESA DISCOUNT	$/VCPU/MO	MIN. VCPUS	MONTHLY	ANNUAL COMMITMENT	ANNUAL SAVING VS PAYG
25%	$36.75	100	$3,675	$44,100	Save $14,700 / yr
30%	$34.30	200	$6,860	$82,320	Save $35,280 / yr
35%	$31.85	400	$12,740	$152,880	Save $82,320 / yr
40%	$29.40	800	$23,520	$282,240	Save $188,160 / yr
45%	$26.95	1,600	$43,120	$517,440	Save $423,360 / yr
50%	$24.50	3,200	$78,400	$940,800	Save $940,800 / yr

ESA Renewal Model: Usage above your committed baseline is absorbed at no charge during the contract year. At annual renewal, minimum commitment resets to your actual peak 30-day usage observed during the year. No mid-year billing surprises.

Fair Use Threshold: If usage exceeds 3× committed baseline for 60+ consecutive days, OpenOva initiates a commercial conversation. No automatic billing or penalties — we offer to adjust your commitment at your contracted rate.

PLATFORM BUILDING BLOCKS — ALL INCLUDED

SECTION 02

Professional Services Rate Card

Applies to custom engagements only. Available as T&M or fixed-scope SOW.

Platform subscription covers automation. Standard provisioning, Day-2 ops, blueprint upgrades, security tooling, observability, DR infrastructure, and AIOps monitoring are included at no additional charge. Professional services apply only to custom migrations, bespoke network designs, and advisory engagements outside automated delivery.

ENGINEERING ROLES & RATES

TIER 1
Engineer
$48
per hour
$384
per day · 8 hrs

VM migrations · Storage migrations · SOC remote monitoring · Standard runbook execution

TIER 2
Senior Engineer
$60
per hour
$480
per day · 8 hrs

DB migrations · Container migration · DR drills · Security assessments · SOC onsite

TIER 3
Lead Engineer
$75
per hour
$600
per day · 8 hrs

Heterogeneous DB · Bigdata migrations · Large container migration · DR design & runbooks

TIER 4
Architect
$94
per hour
$752
per day · 8 hrs

Connectivity LLD · O&M strategy · Bigdata advisory · Enterprise migration architecture

ROLE → SERVICE MAPPING

ENGAGEMENT TYPE	ROLE
VM migration & storage migration	ENGINEER
SOC remote (Specter-assisted)	ENGINEER
Homogeneous DB migration	SENIOR ENG.
Container migration (medium)	SENIOR ENG.
Expert storage migration	SENIOR ENG.
Security scan & assessment	SENIOR ENG.
SOC onsite	SENIOR ENG.
DR drill execution	SENIOR ENG.
Heterogeneous DB migration	LEAD ENG.
Bigdata migration (small scale)	LEAD ENG.
Container migration (large)	LEAD ENG.
DR design & runbook authoring	LEAD ENG.
Direct Connect LLD	ARCHITECT
O&M strategy & consultation	ARCHITECT
Bigdata consultation (large scale)	ARCHITECT

ENGAGEMENT MODELS

TIME & MATERIALS (T&M)

- Billed at hourly rate × actual hours worked
- Invoiced monthly in arrears
- Scope can flex during engagement
- Best for complex or exploratory migrations
- Expenses billed at cost with prior approval

STATEMENT OF WORK (SOW)

- Fixed scope, defined deliverables, clear milestones
- Priced from estimated man-days × role rate
- Change requests priced separately
- 50% upfront · 50% on delivery

Note: OpenOva resources all engagements on a T&M basis internally, regardless of whether the customer contract is T&M or SOW.

SECTION 03 · PART A — DELIVERED BY PLATFORM

Cloud Services Catalog — Built-In at Zero Additional Cost

Delivered end-to-end by OpenOva automation. No man-days. Included in the platform subscription.

Zero professional services cost. The following catalog items are fully automated by OpenOva — Catalyst Bootstrap, Flux GitOps, Kyverno policy engine, Specter AIOps, and pre-built component blueprints eliminate manual effort for standard implementations.

CATALOG SERVICE ITEM	CATEGORY	OPENOVA DELIVERY	PS COST	STATUS
STANDARD PS — LANDING ZONE & SERVICE PROVISION				
IAAS Landing Zone LLD — Start package (IAM / Network / Security / Audit)	Landing Zone	Catalyst auto-generates full LLD from configuration	$0	BUILT-IN
IAAS Landing Zone LLD — Incremental updates	Landing Zone	Flux GitOps continuous reconciliation (every 60s)	$0	BUILT-IN
IAAS Landing Zone Implementation — Start package	Landing Zone	Catalyst + Crossplane automated full-stack provisioning	$0	BUILT-IN
IAAS Landing Zone Implementation — Incremental	Landing Zone	Flux GitOps drift detection and auto-remediation	$0	BUILT-IN
IAM configuration (users, roles, policies)	Landing Zone	Keycloak automated deployment and policy templating	$0	BUILT-IN
Network / VPC / Security Group / ACL configuration	Landing Zone	Cilium eBPF CNI + Kyverno auto-generates NetworkPolicies	$0	BUILT-IN
Audit and logging configuration	Landing Zone	Loki + Alloy + OTel automated audit trail	$0	BUILT-IN
CCE (Kubernetes) provision — LLD + Implementation	Container	Catalyst automated K8s cluster provisioning and blueprint	$0	BUILT-IN
CCE security configuration (policies, scanning, audit)	Container	Kyverno auto-generates PDBs, probes, NetworkPolicies; Falco runtime	$0	BUILT-IN
DB IAAS provision — LLD + Implementation	DB Provision	CNPG / FerretDB operator automated HA deployment	$0	BUILT-IN
DB security and audit (DBSS equivalent)	DB Provision	Kyverno + ESO secret injection; CNPG audit logging automated	$0	BUILT-IN
STANDARD PS — MIGRATION SERVICES				
Cloud Native Container Migration — small scale (<200 vCPU)	Migration	Exodus automated containerization pipeline	$0	BUILT-IN
Container Registry setup (Harbor)	Migration	Harbor automated deployment, scanning, and geo-replication	$0	BUILT-IN
Container image vulnerability scanning	Migration	Trivy continuous scanning in CI/CD, registry, and runtime	$0	BUILT-IN
Container image signing (supply chain security)	Migration	Sigstore / Cosign automated image signing on build	$0	BUILT-IN
SBOM generation for workloads	Migration	Syft automated SBOM generation on every build pipeline	$0	BUILT-IN
STANDARD PS — O&M SERVICES				
O&M plan, design & implementation	O&M	Catalyst Lifecycle Manager Day-2 automation	$0	BUILT-IN
Monitoring dashboards and alerting	O&M	Grafana pre-built dashboards per component; alerting automated	$0	BUILT-IN
Log aggregation, metrics collection, distributed tracing	O&M	Loki + Mimir + Tempo + Alloy full observability stack	$0	BUILT-IN
Auto-scaling (vertical + event-driven)	O&M	VPA + KEDA automated scaling policies	$0	BUILT-IN
TLS certificate management and auto-renewal	O&M	cert-manager automated certificate lifecycle	$0	BUILT-IN
Secret management, rotation, and injection	O&M	OpenBao + ESO automated rotation and sync	$0	BUILT-IN
Backup scheduling and restore automation	O&M	Velero automated schedules and retention policies	$0	BUILT-IN
WAF rule configuration (OWASP CRS)	O&M	Coraza + OWASP Core Rule Set automated	$0	BUILT-IN
mTLS service-to-service encryption	O&M	Cilium Service Mesh automated mTLS across all services	$0	BUILT-IN
GSLB and DNS failover	O&M	k8gb + ExternalDNS automated authoritative DNS + GSLB	$0	BUILT-IN
AIOps — self-healing, drift detection, autonomous ops	O&M	Specter pre-built semantic models for every component	$0	BUILT-IN
HIGH-LEVEL PS — BIGDATA & DR INFRASTRUCTURE				
Bigdata IAAS provision LLD + Implementation — small scale	Bigdata	Fabric blueprints: Strimzi + Flink + Temporal + ClickHouse automated	$0	BUILT-IN
DR infrastructure (backup + GSLB + multi-region failover)	DR	Velero + k8gb + Failover Controller fully automated	$0	BUILT-IN
HIGH-LEVEL PS — SECURITY TOOLING				
Security tooling deployment (scanning + runtime + policy)	Security	Falco + Trivy + Kyverno + Syft+Grype automated via Flux	$0	BUILT-IN
Policy-as-code enforcement and compliance automation	Security	Kyverno declarative policies, auto-generated on every workload	$0	BUILT-IN
Usage metering and cost attribution	Security	OpenMeter automated metering across all workloads	$0	BUILT-IN

SECTION 03 · PART B — CUSTOM ENGAGEMENTS · SECTION 04 — TERMS

Chargeable Services & Commercial Terms

Services requiring human expertise beyond platform automation, billed at published rate cards.

CATALOG SERVICE ITEM	PS LEVEL	ASSIGNED ROLE	$/HR	$/DAY
STANDARD PS — CONNECTIVITY				
Direct Connect Service — Low Level Design	Standard PS	ARCHITECT	$94	$752
Direct Connect Service — Implementation	Standard PS	SENIOR ENG.	$60	$480

DR Drill execution	High-Level PS	SENIOR ENG.	$60	$480
Security Assessment — tenant environment + app layer scan	High-Level PS	SENIOR ENG.	$60	$480
SOC Service — remote (Specter-assisted)	High-Level PS	ENGINEER	$48	$384
SOC Service — onsite	High-Level PS	SENIOR ENG.	$60	$480

COMMERCIAL TERMS

- All rates in USD. Local currency equivalent on request.
- PAYG: monthly in arrears on actual vCPU count.
- ESA: 100% upfront or 50/50 split within 30 days of signing.
- ESA renewal minimum = peak 30-day usage in prior year.
- T&M: monthly in arrears. SOW: 50% up / 50% delivery.
- Expenses (travel, accommodation) at cost, prior approval required.
- All rates exclude applicable taxes. Payment terms: Net 30.

INCLUDED VS. NOT INCLUDED

- ✓ Full platform — all components within support matrix.
- ✓ Automated provisioning, Day-2 ops, blueprint upgrades.
- ✓ Specter AIOps, Catalyst, all product families.
- ✓ Usage growth during ESA year absorbed at no charge.
- ✗ Customer customisations beyond OpenOva blueprints.
- ✗ Versions outside the OpenOva support matrix.
- ✗ Third-party vendor support obligations.

OpenOva is an AI-native infrastructure platform. Curated open-source components on Kubernetes — every one AI-manageable by design. Specter carries pre-built semantic knowledge of every integration dependency, failure mode, and compliance mapping. Token-efficient, surgical, and accurate. This document is valid for 90 days from issue date. Rates are subject to change upon renewal with 60 days written notice.
